Portfolio: aswinmurugalingam.com

IT Administrator | Network & Systems

Professional Summary

IT Administrator with experience in **network infrastructure, FortiGate firewall configuration, and QNAP NAS administration**, supporting stable and secure IT environments. Skilled in handling **installation, configuration, troubleshooting, and maintenance** of systems and network devices to ensure smooth operations.

Experienced in **system deployment, workstation setup, and performance optimization**, with strong knowledge of Windows environments and centralized storage systems. Focused on minimizing downtime and delivering **reliable and efficient IT support solutions**.

Experienced in handling **data-driven workflows and system integration**, with the ability to design structured solutions for data processing and reporting. Strong understanding of **application logic, file-based architectures, and system reliability**, ensuring data integrity and operational efficiency.

Hands-on experience in developing **internal automation systems**, including an attendance and expense management application using **PHP (Laravel), HTML, CSS, JavaScript, and Python**. Capable of supporting both **infrastructure and application-level requirements** in integrated environments.

Education

Diploma In Electronics & Communication Eng.

NMS Kamaraj Polytechnic College, Pazhavilai

Directorate of Technical Education (DTE)

2017 - 2020

HSC Computer Science

Good Shepherd Matric.Hr.Sec.School, Nagercoil

Tamil Nadu State Board syllabus

2015 - 2017

Industrial Experiences

IT Administrator (Electra Surveying Engineering Services)

Dubai, UAE

July 2024 - Mar 2026

- Managed IT infrastructure troubleshooting, diagnostics, and maintenance
- Configured and maintained **LAN/WAN infrastructure, switches, routers, and FortiGate firewalls**
- Administered **QNAP NAS systems (storage, backup, and performance optimization)**
- Developed and maintained **internal attendance & expense system** using structured data and reporting logic
- Developed structured **data processing and reporting workflows** for internal systems
- Monitored network performance and resolved connectivity issues to minimize downtime
- Installed and supported **high-performance workstations and engineering software**
- Provided **on-site IT support for survey field operations**

IT Technician (PGM Electro Private Limited, Nagercoil)

Tamil Nadu, India

Working Location: ISRO Propulsion Complex, Mahendragiri

Jan 2022 - Jun 2024

- Assisted in regular maintenance, troubleshooting, and repair of computer systems and network devices.
- Supported installation and configuration of hardware and software.
- Provided technical support to staff, resolving hardware and software issues.
- Contributed to network setup, monitoring, and performance optimization.

Key Projects

Electra Attendance Management System

- Designed and developed **web-based attendance application** using **HTML, CSS, and JavaScript**, hosted on QNAP web server
- Implemented workflow for **survey team data submission** with required fields (**project, location, workdays, etc.**)
- Automated storage of attendance data into **monthly Excel files on centralized NAS**
- Ensured **data validation, structured storage, and consistency across records**
- Enabled reliable tracking of workforce activity across multiple locations
- Converted web application into **Android APK using Android Studio** for deployment on surveyors' mobile devices

Electra Project Expense Management System

- Developed system to **calculate project costs based on attendance and salary data**
- Integrated attendance records with **employee salary structure** for automated cost computation
- Implemented logic for **monthly filtering, project-wise cost analysis, and reporting**
- Reduced manual calculation effort and improved **accuracy in project financial tracking**
- Structured data workflow for **efficient reporting and decision support**

Drone Visualization Platform (Pano2VR + Laravel)

- Processed drone-captured 360° images into **interactive visualization environments using Pano2VR**
- Developed web-based platform using **PHP (Laravel)** to display project data to clients
- Integrated **image navigation with positional context (distance/height from ground)**
- Deployed projects on **separate domains for each client/project**
- Managed hosting, file structure, and performance for smooth user experience

Additional Courses

- ❖ **ICT Computer Education, Nagercoil**
Certified Courses in Word, Excel, C, C++, Java, Python
July 2020 - December 2020
- ❖ **Greens Technologies, Chennai**
iOS Development
April 2021 - September 2021

Technical Skills and Strengths

- **Network & Security:** FortiGate Firewall, LAN/WAN, VLAN
- **Storage Systems:** QNAP NAS Configuration & Management
- **Systems:** Windows Workstations, Hardware Deployment & Optimization
- **Software:** AutoCAD, MicroStation, Magnet Collage, Google Earth Pro
- **IT Operations:** Troubleshooting, Maintenance, Technical Support
- **Workstation Build:** High-performance PC assembly & optimization
- **Soft Skills:** Analytical thinking, teamwork, communication

Languages Known

- ❖ **Tamil:** Native Speaker
- ❖ **English:** Fluent in speaking, reading, and writing
